

DRINK TO A HEALTHY HAPPY FAMILY

Love for her family saw actress Sherry Tan use AOX alkaline water, naturally infused with hydrogen, oxygen and rich in antioxidants, to improve her children's health and well-being.

As the heart of a family, nothing brings mothers greater joy and satisfaction than a healthy, happy family. And AOX water's many satisfied customers, like local artiste Sherry Tan, passionately share how something as basic as water has benefitted their families.

THE OBVIOUS CHOICE

AOX brand ambassador Sherry Tan chose AOX because unlike an Alkaline Ioniser, AOX does not require electricity and it does not produce any waste water. It is just like having a natural hot and cold spring in her house.

THE SCIENCE IN THE WATER

Essentially, the AOX water dispenser is a purifier and it infuses the tap water with hydrogen, oxygen and negative ions, giving it anti-oxidant properties. Alkalised, mineralised and molecularly smaller, AOX water is also more easily absorbed by the body, aiding hydration. Over two separate blood tests, Sherry witnessed the benefits of AOX water in neutralising the free-radicals in

her body and restore balance at a cellular level, "I'm amazed and convinced at the benefits," she shares. Images on the right show the improvements Sherry experienced after drinking the AOX water.

FAMILY FIRST

Sherry proudly shares that the improvement in her energy levels and overall well-being was noticeable after just months of drinking AOX water. But she's most happy with how the water's pH balancing properties have dramatically eased her daughters' skin woes. Drinking AOX water not only reduced the frequency of her daughters' eczema outbreaks, but it has also helped "reduce the itch and stop them from scratching" when it did happen. The benefit: fewer doctor's appointments and less medication, which Sherry disapproves of, "I don't like the idea of using steroids because of the side-effects." Sherry also hopes that the AOX dispenser she's recently bought for her father will aid his recovery from a stroke.
