

THE ANTI-AGING WATER

By Eunice Lim

What is free radical?

Free radical is responsible for aging, tissue damage and possibly some diseases.

What are antioxidants?

They are molecules that prevent free radicals from harming healthy tissue. Traditionally, antioxidants are present in many foods and fruits.

The essential elements of life – Clean Air and Filtered, Mineralized Alkaline Water. In Singapore, even though our tap water is well within the World Health Organisation drinking water guidelines, there are people who still insist on boiling water or using water filter at home. While boiling water is the most effective way method of destroying bacteria, more health conscious people prefer drinking alkaline water for its health benefits.

Alkaline water has a higher pH level than tap water. Mr Jeffrey Tan of JC Living Stream, is passionate about alkaline water. He says, "Alkaline Water can neutralise acidic waste in your bloodstream, boost your energy level and metabolism, and help your body absorb nutrients more effectively". He added that it could also help you to strengthen your immune system, fight free radicals, and thus, slow the aging process.

To obtain alkaline water, we can choose to use Alkaline Ionizer water dispensers or AOX Antioxidant Alkaline filter. However, unlike the typical alkaline water, which is converted by Alkaline Ionizer water dispensers through electrolysis ionizer, AOX water technology is able to sustain very stable alkaline properties, and boiling does not remove the alkaline minerals.

By drinking AOX Alkaline water, you get natural minerals such as Calcium, Magnesium, Potassium and Sodium (HSA tested), which you do not typically get from the regular alkaline ionizer water dispensers, or tap water.

To test the validity of these claims of AOX Antioxidant Alkaline water, I took up their challenge and went through a Live Blood Analysis offered by Mr Tan who was trained in Darkfield Microscopy by a German Medical Doctor Eddy Betterman. My "before" result was generally good, except for some presence of free radicals damaged cells.

After the first analysis, I had to drink a large glass of AOX water. The second analysis took place 20 minutes later and again, we scanned through my entire sample. This time, there was no sign of free radicals at all. It works! Antioxidant properties work like Vitamin C to restore the damaged blood cells.

Mr Jeffrey Tan after his research and training highly recommends AOX water to people of all walks of life for ongoing good health and wellness.

Approved by both FDA and KFDA, the water produced by AOX Antioxidant Alkaline filter is also tested by HSA in Singapore.

What are the benefits of AOX water?

Rich in Alkaline Minerals
Strong Anti-Oxidant Properties
Works like Vitamin C

Stand to WIN an AOX-2000 Water Dispenser (worth \$1899)

Or

One of the 50 **FREE Live Blood Analysis Session** (worth \$120)

Simply tell us the answer for the following statement:

"AOX water provides anti-aging effects."

True or False.
