

# Wellspring of Life

The testimonials speak for themselves. From the disappearance of irritating conditions to weight loss, all it took many to feel better was a change of drinking water.

For three years, Stephen Seow, 78, suffered from gout, commonly known as “rich man’s disease” caused by an accumulation of uric acid in the blood. With a swollen big toe on his left foot, walking was agonising. His condition also left him fatigued to the point of needing afternoon naps to get through each day.

Convinced by a church friend to try the AOX blood analysis, Stephen discovered his blood contained traces of heavy metals. Hopeful for relief without drugs, he started on AOX Antioxidant alkaline water in late November 2011, and was pleasantly surprised.

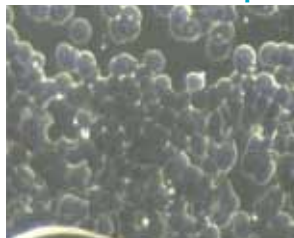

“After drinking for about a week, I woke up one morning and noticed that the pain in my big toe had disappeared. Now, I don’t feel sleepy and don’t need to take my afternoon naps at all,” he says happily.

## Cleansing from the inside

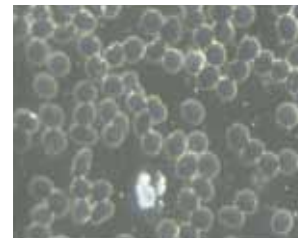

It makes sense that our bodies need cleansing. After all, we know how unhealthy it would be to live in a dirty home. But while most of us remember to shower, we ignore the internal build-up of toxins from poor food/drink choices, and pollution. And there is that other invisible damaging factor – stress. Prolonged stress results in toxic stress response, an elevation in heart rate, blood levels and hormones like cortisol – all of which over the long term can result in debilitating illnesses like heart disease and diabetes.

AOX water detoxifies the body by improving immunity,

increasing metabolism and neutralising acidity levels.

Jeffrey Tan, 49, Darkfield Microscopist of Living Stream used to suffer from a range of medical problems such as migraine, dry eyes and eczema. All these abated within a few months of consuming AOX water.

When is water not just water? Jeffrey explains, “AOX water is steeped in anti-oxidant properties to keep cells healthy and from mutating into something malignant. It is fortified with natural minerals such as calcium and magnesium (for the bones), potassium and sodium (to aid in the formation of healthy blood cells) and silica (for strong joints). For every AOX water dispenser, the customer is entitled to a complimentary annual health check-up.”

Get a blood analysis done. It’s the easiest way to ‘see’ what’s happening. Please call JC Living Stream Pte Ltd at **6456 4321** or email to [sales@aox.com.sg](mailto:sales@aox.com.sg)

Win one AOX-2000 Water Dispenser (Worth \$1899) or One of 50 Free Live Blood Analysis sessions (worth \$120 each) Fill the coupon and mail to:

**Robinson Road Post Office**  
**P.O. Box 189**  
**Singapore 900339**

Winners will be notified by email.
