- NO RISK OF RUSTY ELECTRODE PLATES
- AOX USES 100% NATURAL BIO-MINERALS
- SGS Lab, AVA, WHO, FDA and KFDA
- TESTED 100% SAFE!

BENEFITS

- **AOX** water is a powerful antioxidant. Antioxidants help protect our body from free radicals that can cause various health problems. Our body needs antioxidants to help combat the effects of free radicals in our environment.
- **AOX** water effectively balances the pH levels of the body. Our body tries to naturally maintain the acid-alkaline balance of our blood. However, when our body is overly acidic, our system has to work even harder to keep that balance. Keeping our body in a more alkaline state will boost our immune system.
- **AOX** water promotes better hydration and detoxification. AOX water has smaller molecular content making it easier for our body to absorb. This assists in making our body function at optimum levels. Small clustered water has the ability to flush out toxins that are harmful to our body.
- **AOX** water has an abundance of negative ions. Negative ions increase the flow of oxygen to the brain resulting in higher alertness and more mental energy. Our blood cells are separated causing an increase in blood circulation. Not all alkaline waters are the same. Our powerful live blood analysis will show you this fact.
- **AOX** water helps in skin, nails, hair, joints and bones. AOX water contains silica which has long been a go-to supplement for skin, hair and nails; vital to healthy joints, ligaments and cartilage; vital to bone health, preventing fractures as we grow older.

DESCRIPTION

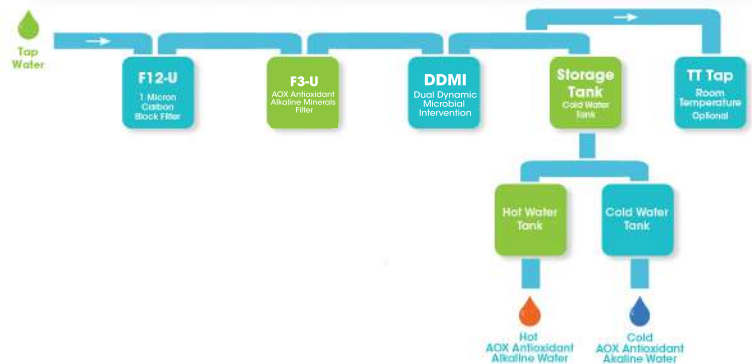

Ideal for offices. Elegantly constructed, glossy finish with tempered glass face, this beauty will complement any office, exclusive clubs, hotels, F&B outlets, perfectly.

With the Heavy-Duty Storage Tank, you will not run out of hot water to make a cup of aromatic coffee! Iced-cold water is readily available by a push. Convenience at your finger-tips! Floor Standing model is versatile. You can place the dispenser anywhere!

Capacity: Hot 5L
Cold 6.2L
Chilling System: LG compressor
R-134a 40g Refrigeration Gas.
Water Temperature:
Cold +/-10 Degrees C,
Hot +/-80 Degrees C

Dimension (cm): W31 x D36 x H117cm
Power Consumption: Compressor 110W,
Heater 500W/800W,
Net Weight: 21 Kg
Gross Weight: 22.5kg
Power: AC220 ~240V/50Hz
