

A beautiful me.

AO+ harnesses the beneficial properties of extra virgin olive oil's Vitamin A, D, E, K and Alpha-Lipoic Acid, and supercharges them through a 6-day Active Oxygen Infusion Process. The finished product is a non-greasy ozonated olive oil known as OZOO.

OZ50UH is suitable for use as a natural sunblock, moisturiser and cleanser for all skin types and ages. It deeply hydrates and protects the skin, thus reducing the appearance of fine lines, wrinkles, pigmentation and other signs of skin ageing, while accelerating the growth of skin cells to repair cellular damage.

Its natural antibacterial and antifungal properties can be helpful in the treatment of skin conditions such as athlete's foot, candida, tinea versicolor, acne, insect bites, eczema and psoriasis.

In addition, it may reduce the appearance of under-eye bags and circles, and help in the treatment of cellulite and stretch marks.
