

AOX-4000 PURE

Premium Purified Water

- Direct piping - No disruption of dispensing water
- Low cost of maintenance
- Safe to drink without boiling
- No harmful ionizing radiation
- Independent lab-tested 99.99% Coliform Bacteria removal
- Removal of heavy metals such as soluble lead and fluoride

BENEFITS

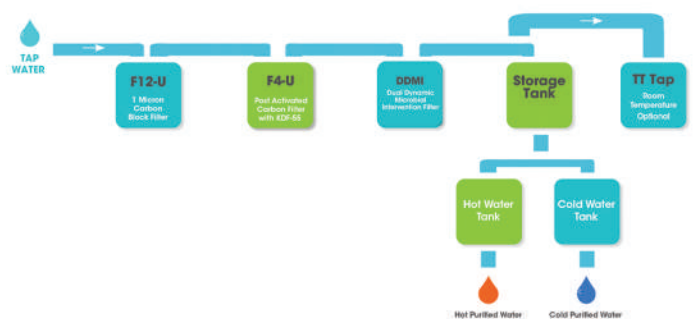

AOX-4000 PURE consists of a 5-stage filtration system (1 Micron Carbon Block - 2 stages, Post Carbon, KDF-55, Dual Dynamic Microbiological Interception Filter). The DDMI filter is designed to provide you with clean and healthy water even in 3rd world countries where the quality of the source water is poor. Highly efficient in removing sediments such as sand, rust and other toxic substances, the DDMI filter has also been extensively tested and proven by certified labs in Singapore to remove 99.99% of microscopic bacteria and other contaminants from the water such as heavy metals and fluoride. Compared to reverse osmosis, which strips away all trace minerals, is acidic and too pure for human consumption, the DDMI retains the essential minerals in the water which are important for a healthy body.

DESCRIPTION

The AOX-4000 PURE is designed specifically for customers who are looking for purified water. Equipped with the latest filtration technology, you can be assured that you are drinking the best, premium purified water. With AOX-4000 PURE, you can now enjoy your cup of hot coffee or cold water without any of the fuss of having to wait for the water to boil or chill in the fridge.

- Dimension: W30 x D33 x H104 cm
- Net Weight: 14.5kg
- Gross Weight: 18kg
- Power Consumption: Compressor 120W, Heater 575W
- Hot: +/- 85 Degree Celcius
- Cold: +/- 10 Degree Celcius
- Stainless Steel Hot Tank Capacity: 2L
- Stainless Steel Cold Tank Capacity: b2L
