

AOX-6100 PURE Premium Purified Water

- Low cost of maintenance
- Safe to drink without boiling
- No harmful ionizing radiation
- Direct piping - No disruption of dispensing water
- Independent lab-tested 99.99% Coliform Bacteria removal
- Removal of heavy metals such as soluble lead and fluoride

BENEFITS

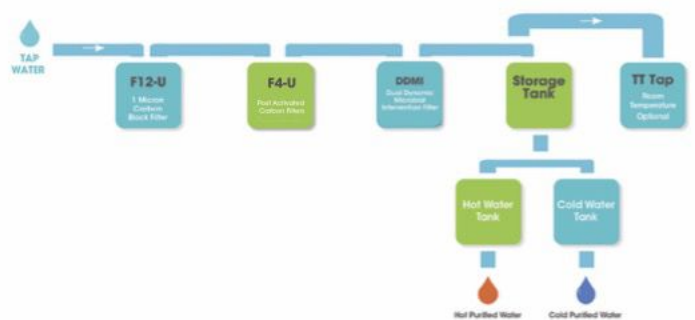

AOX-6100 PURE consists of a 5-stage filtration system (1 Micron Carbon Block - 2 stages, Post Carbon, KDF-55, Dual Dynamic Microbiological Interception Filter). The DDMI filter is designed to provide you with clean and healthy water even in 3rd world countries where the quality of the source water is poor. Highly efficient in removing sediments such as sand, rust and other toxic substances, the DDMI filter has also been extensively tested and proven by certified labs in Singapore to remove 99.99% of microscopic bacteria and other contaminants from the water such as heavy metals and fluoride. Compared to reverse osmosis, which strips away all trace minerals, is acidic and too pure for human consumption, the DDMI retains the essential minerals in the water which are important for a healthy body.

DESCRIPTION

Easy on the eye, this hot & cold premium purified water dispenser is designed specifically with an office setting in mind. Enjoy your cup of hot coffee or cold water without any fuss or having to wait for the water to boil or chill in the fridge. Optional: Add an Award Winning TT Tap for room temperature water.

- Dimension: W28 x D41 x H112 cm
- Net Weight: 18kg
- Gross Weight: 19kg
- Power Consumption: Compressor 90W, Heater 500W
- Hot: +/- 80 Degree Celcius
- Cold: +/- 10 Degree Celcius
- Stainless Steel Hot Tank Capacity: 1.75L
- Stainless Steel Cold Tank Capacity: 5.6L
